Maxillofacial System

PEHCHAN
PHARMACEUTICALS AND SURGICALS LLP

“OPENING A WORLD OF ENDLESS POSSIBILITIES TO AUGMENT YOUR ART OF LIVING”

About Us

At Seinser, we believe in three foundational elements more than anything else while manufacturing the surgical implants - quality, consistency and innovation. We have established our manufacturing unit, the first of its kind across India, with an undying zeal to help humankind smile the brightest and live unstoppably.

Walking on the paths of the Make In India initiative while also taking precisions to maintain international standards, Seinser strives to manufacture and bring to you unmatched quality of world-class maxillofacial, neuro and spine implants that augment your art of living.

With experience and in-depth knowledge in the sphere of osteosynthesis, we have so far gained the trust and credibility of doctors and surgeons across the country. Keeping such recognition and reliability gained from our home country as our inspiration, we are at the door of bringing endless possibilities as we join the parade to export our products across international borders.

BIOCOMPATIBILITY AND ADAPTABILITY

At Seinser, we work on the principles of optimised customisation. Our products inherently come with biocompatibility and adaptability and ensure that the patients receive utmost safety and care.

Biocompatibility is a state of acceptance for synthetic implants by the surrounding tissues and human body without any undesirable reactions, allergic responses, inflammation or chronicle problems. More importantly, biocompatibility ensures that the materials are not carcinogenic.

The adaptability of surgical implants means how seamlessly they fit the bone structure of an individual's anatomy. With biology, the anatomy of every individual differs too. Our products are customised to fit an individual's bone structure and size precisely without compromising on comfort in any way.

Maxillofacial System

SEINSER Smart Fixation system brings to you the most advanced maxillofacial system comprising of the most enhanced screw retention technology. The Seinser maxillofacial kit consists of plates, screws and instrumentation used for fixation of craniofacial, midface and mandibular fractures or correction surgeries.

Plates

- Non-reversible boneplates
- Low screw/plate interface
- Optimal balance profile height and strength
- Rounded edges on plates for less irritation to soft tissue
- Medical grade titanium
- Color coding by diameter for easy identification

Screw

- An excellent grip on the bone
- Selfdrilling and Selftapping screws
- Self holding screw for Improved pick-up performance
- Improved off-axis stability during insertion
- Lower profile height of screw head
- Improved insertion of self-drilling screws

Instruments

- Different blade for each diameter.
- Friction lock system for better screw holding.
- Standardized instrumentation
- Ergonomic screwdriver handle
