“OPENING A WORLD OF ENDLESS POSSIBILITIES TO AUGMENT YOUR ART OF LIVING”

About Us

At Seinser, we believe in three foundational elements more than anything else while manufacturing the surgical implants - quality, consistency and innovation. We have established our manufacturing unit, the first of its kind across India, with an undying zeal to help humankind smile the brightest and live unstoppably.

Walking on the paths of the Make In India initiative while also taking precisions to maintain international standards, Seinser strives to manufacture and bring to you unmatched quality of world-class maxillofacial, neuro and spine implants that augment your art of living.

With experience and in-depth knowledge in the sphere of osteosynthesis, we have so far gained the trust and credibility of doctors and surgeons across the country. Keeping such recognition and reliability gained from our home country as our inspiration, we are at the door of bringing endless possibilities as we join the parade to export our products across international borders.

BIOCOMPATIBILITY AND ADAPTABILITY

At Seinser, we work on the principles of optimised customisation. Our products inherently come with biocompatibility and adaptability and ensure that the patients receive utmost safety and care.

Biocompatibility is a state of acceptance for synthetic implants by the surrounding tissues and human body without any undesirable reactions, allergic responses, inflammation or chronicle problems. More importantly, biocompatibility ensures that the materials are not carcinogenic.

The adaptability of surgical implants means how seamlessly they fit the bone structure of an individual's anatomy. With biology, the anatomy of every individual differs too. Our products are customised to fit an individual's bone structure and size precisely without compromising on comfort in any way.
